

Hiding In The Noise: Preparing The Irregular Warfare Community For The Age Of AI

Description

by Matthew Moellering

According to the 2020 [Irregular Warfare Annex](#) to the National Defense Strategy, the United States is underprepared to counter irregular warfare; the dawn of the [AI age](#) compounds this problem. As AI continues to transform human society by fundamentally changing how people experience reality, US adversaries are already using it to augment their forces, conventional and unconventional alike.

To win, the United States will need to both combat AI-enabled adversaries and find creative ways to get its forces running at machine speed using AI. To effectively conduct irregular warfare in the AI age, the US military must adapt its doctrine and training to address these AI-enabled threats.
